

SAN FRANCISCO
MUNICIPAL TRANSPORTATION AGENCY
BOARD OF DIRECTORS

RESOLUTION No. 230815-069

WHEREAS, the Geary corridor is one of the busiest bus corridors in the country, with corridor ridership recently as high as 56,000 pre-pandemic and currently at about 36,000; and

WHEREAS, the first phase of Geary transit and safety improvements east of Stanyan Street was completed on schedule in fall 2021 and resulted in significant transit and safety improvements, including up to 18% faster bus travel times, a 37% improvement in transit reliability, and an 81% reduction in excessive speeding by private vehicles; and

WHEREAS, gaps in existing Geary corridor transit lanes, substandard bus zones, and near-side bus stops all contribute to slower, less reliable travel time, degrade the Muni rider experience, and make the boarding experience less comfortable, especially for seniors and riders with disabilities; and

WHEREAS, on average one person walking is injured in a traffic collision within the project area each month and the project limits are a part of San Francisco's High-Injury network with a disproportionately higher collision rate; and

WHEREAS, side-running transit lanes have the ability to accelerate transit and safety benefits, limit construction disruption, preserve transit operational flexibility, improve cost effectiveness, and avoid center median tree removal as compared to center-running transit lanes, and these positive results are evidenced in the transit lanes implemented east of Stanyan Street and via the Geary Emergency Transit Lanes project; and
