## SFMTA Elevator/Escalator Rehabilitation Program

| CN-FC31

### Capital Need Description

Forty elevators and escalators are located in the Muni Metro System. The twelve remaining elevators are located at other facilities. This program replaces several components that are most prone to failure, including door operators, landing doors, cab doors, door tracks, sills and sill angles, thus extending their useful life and improving reliability. These upgrades are especially necessary for ensuring accessibility concerns for seniors and people with disabilities.

### Capital Need Justification

The Capital Need will improve the reliability of station elevators and ensure consistent and safe access to stations for persons with disabilities.
