

# HOWARD STREET QUICK-BUILD PROJECT

## Project Location

Howard Street from The Embarcadero to Third Street

## Date of Implementation

December 2020

## Project Elements

- Upgrade the existing bike lane to a parking-protected bikeway in the westbound direction to provide a more comfortable and separated space for people riding bikes
- Daylighting at intersections and driveways to improve intersection visibility
- Increase the number of yellow zones to improve loading for commercial businesses
- Traffic lane reduction to redistribute roadway space for all road users

## PROJECT FINDINGS - AT A GLANCE

Estimated average vehicle speeds remain unchanged along project area.

Average annual total collisions have decreased by **43%** (from 23 before implementation to 13 post implementation).

Midblock vehicle-bike collisions have been eliminated (from 40% of total vehicle-bike collisions before implementation to 0% post implementation).

## NEXT STEPS

Implemented changes will inform the design for the Transbay Howard Streetscape project. Design of a two-way protected bikeway, traffic signals, bike signals, bulbouts, and landscaping is currently in progress.
