

CONSTRUCTION UPDATE: Upper Market Safety Project

Approved design of new protected, curbside bikeway from Buchanan St to Octavia Blvd

Market Street between Duboce/Buchanan and Octavia Blvd is under construction from February 1st through late March to provide new safety improvements, including a new protected, curbside bikeway and pedestrian enhancements to the Guerrero and Hermann/Laguna street intersections.

Construction impacts will be minimal at first as curb ramps are installed at a few locations. Re-paving will occur overnight on two consecutive weekend nights (anticipated to occur mid-to-late February), while the bulk of the construction activities will include forming concrete islands and re-striping traffic lanes. Construction will largely avoid the commute peak hours, but Market Street will be reduced to one lane in each direction midday for much of late February and early March, while brief lane closures on Guerrero and Laguna streets are also expected.
