Wednesday, June 25 (6 - 7:30 p.m.) at 270 6th St. (SoMa Rec Center)

The Howard Street Buffered Bikeway Project is a near term roadway safety project on Howard Street between 6th and 10th streets.

This project will increase safety for people biking and walking on Howard Street by creating a buffered bicycle lane, painting temporary sidewalk extensions, and reducing the width of traffic lanes people walking need to cross. This design originates from design identified in previous SoMa community outreach efforts.

As part of the upcoming project implementation, the SFMTA will hold a community open house to discuss the project conduct further community outreach.

For more information concerning meeting access or accommodations, or if you wish to comment on the project, please contact Nick Carr at nick.carr@sfmta.com or 415.701.4468.
