

San Francisco's parking environment is not sustainable

More than 60,000 disability parking placards issued

Less than 30,000 on-street metered spaces

Only 700 blue zone spaces

The City's Accessible Parking Advisory Committee has proposed significant changes to both state law and local policy. Some of the proposed recommendations include charging placard holders to park and imposing time limits, along with a 70% increase in blue zone spaces and new ways to combat fraud.

We will be joined by Committee Co-Chairs, Municipal Transportation Agency (MTA) Director Ed Reiskin and Mayor's Office on Disability Director Carla Johnson, as well as MTA and City staff. Please join us for an opportunity to learn more about the recommendations and ask questions!
