Feedback

- Strong interest in pedestrian safety
- Concerns with traffic circulation impacts
- Requests for angled parking on LGH

Improving Safety at the N Judah Turnaround

The SFMTA is planning changes to the N Judah Turnaround at the intersection of Judah and La Playa to address a history of collisions. In addition to preventing vehicles from traveling through the Muni turnaround, the SFMTA is proposing to restrict some vehicle movements to reduce conflicts between vehicles and pedestrians. On-street parking may be added by converting parallel parking to angled parking. A bikeshare station will also be installed on Lower Great Highway at Judah.

There will be no impact to the N Judah stops due to these modifications. You will catch the train from your usual stop.
