

How's the L Taraval Treating You?

OVER 130 PEOPLE TOOK OUR TEXT-BASED SURVEY. HERE'S WHAT WE HEARD:

Hey! How's the L treating you?

What would improve your ride?

Fix the tracks. It makes big noise that is killing people [who] live around.

Fewer stops to speed it up -- on 15th, it stops at each corner on one block; does the same at 22nd; then every other block the rest of the way, which is totally unneeded -- way too many!

Make Taraval a car free street, so we can board and exit the L without risking getting run over by cars.

More two car trains

Boarding islands would be good to get on the train or off the train

Remove some stops. It slows it down.

More enforcement on cars that do not stop for muni. I have witnessed many clipped pedestrians and close calls

Having to step off/ on the tram into traffic with a young child is very dangerous. Cars frequently don't stop. Having an island to get on and off the tram will stop someone having a serious accident.

More reliability by adding more signals/ removing 4-way stops and required right turns for side streets
