ONGOING: Third Street Bridge Rehabilitation Project *continued*

Since July, crews have begun phase two of the rehabilitation work. Phase two construction work involves travel lane shifts and other adjustments to the roadway and work area. Vehicle and bicycle access via travel lanes across the bridge continue to be available in each direction, northbound and southbound (**except during periods of full temporary bridge closures when the pending scope of work restricts access across the bridge for all vehicle, bicycle and pedestrian traffic**). Pedestrian access is available via the sidewalk along the eastern side of the bridge. People on bike may also choose to walk their bicycle along the pedestrian sidewalk as an alternative to riding across the bridge via the travel lane. Pedestrian access via the sidewalk along the western side of the bridge may be unavailable during different phases of upcoming work.

Third Street Bridge is open and access across the bridge is available. Please note, to complete remaining rehabilitation work, future short duration full bridge closures are anticipated to through December 2019. Closure details will be announced as soon as information is finalized.

Construction scheduling is subject to change due to rain or other weather delays, equipment breakdown, and/or unforeseen field conditions. Additional periods of short closures may be possible, if necessary, to complete remaining rehabilitation work. Information will be shared closer to that period should additional closures seem necessary and details are finalized. Updates will be posted to the project webpage. For details about the project, the latest construction updates and suggested detour routes for pedestrians, bicyclists and vehicles, visit: www.sfpublicworks.org/thirdstreetbridge.
