

Muni Forward Update

SFMTA Board

May 7, 2019

The Muni System

- Over 700,000 daily riders – more than BART, Caltrain, AC Transit and SamTrans combined
- Over 25% of all trips – and 33% of commute trips – in San Francisco are made by transit
- Over 80% of Muni trips are by bus and surface rail

Challenges

- San Francisco is growing
- Muni service is subject to gaps and delays
- Riders expect more

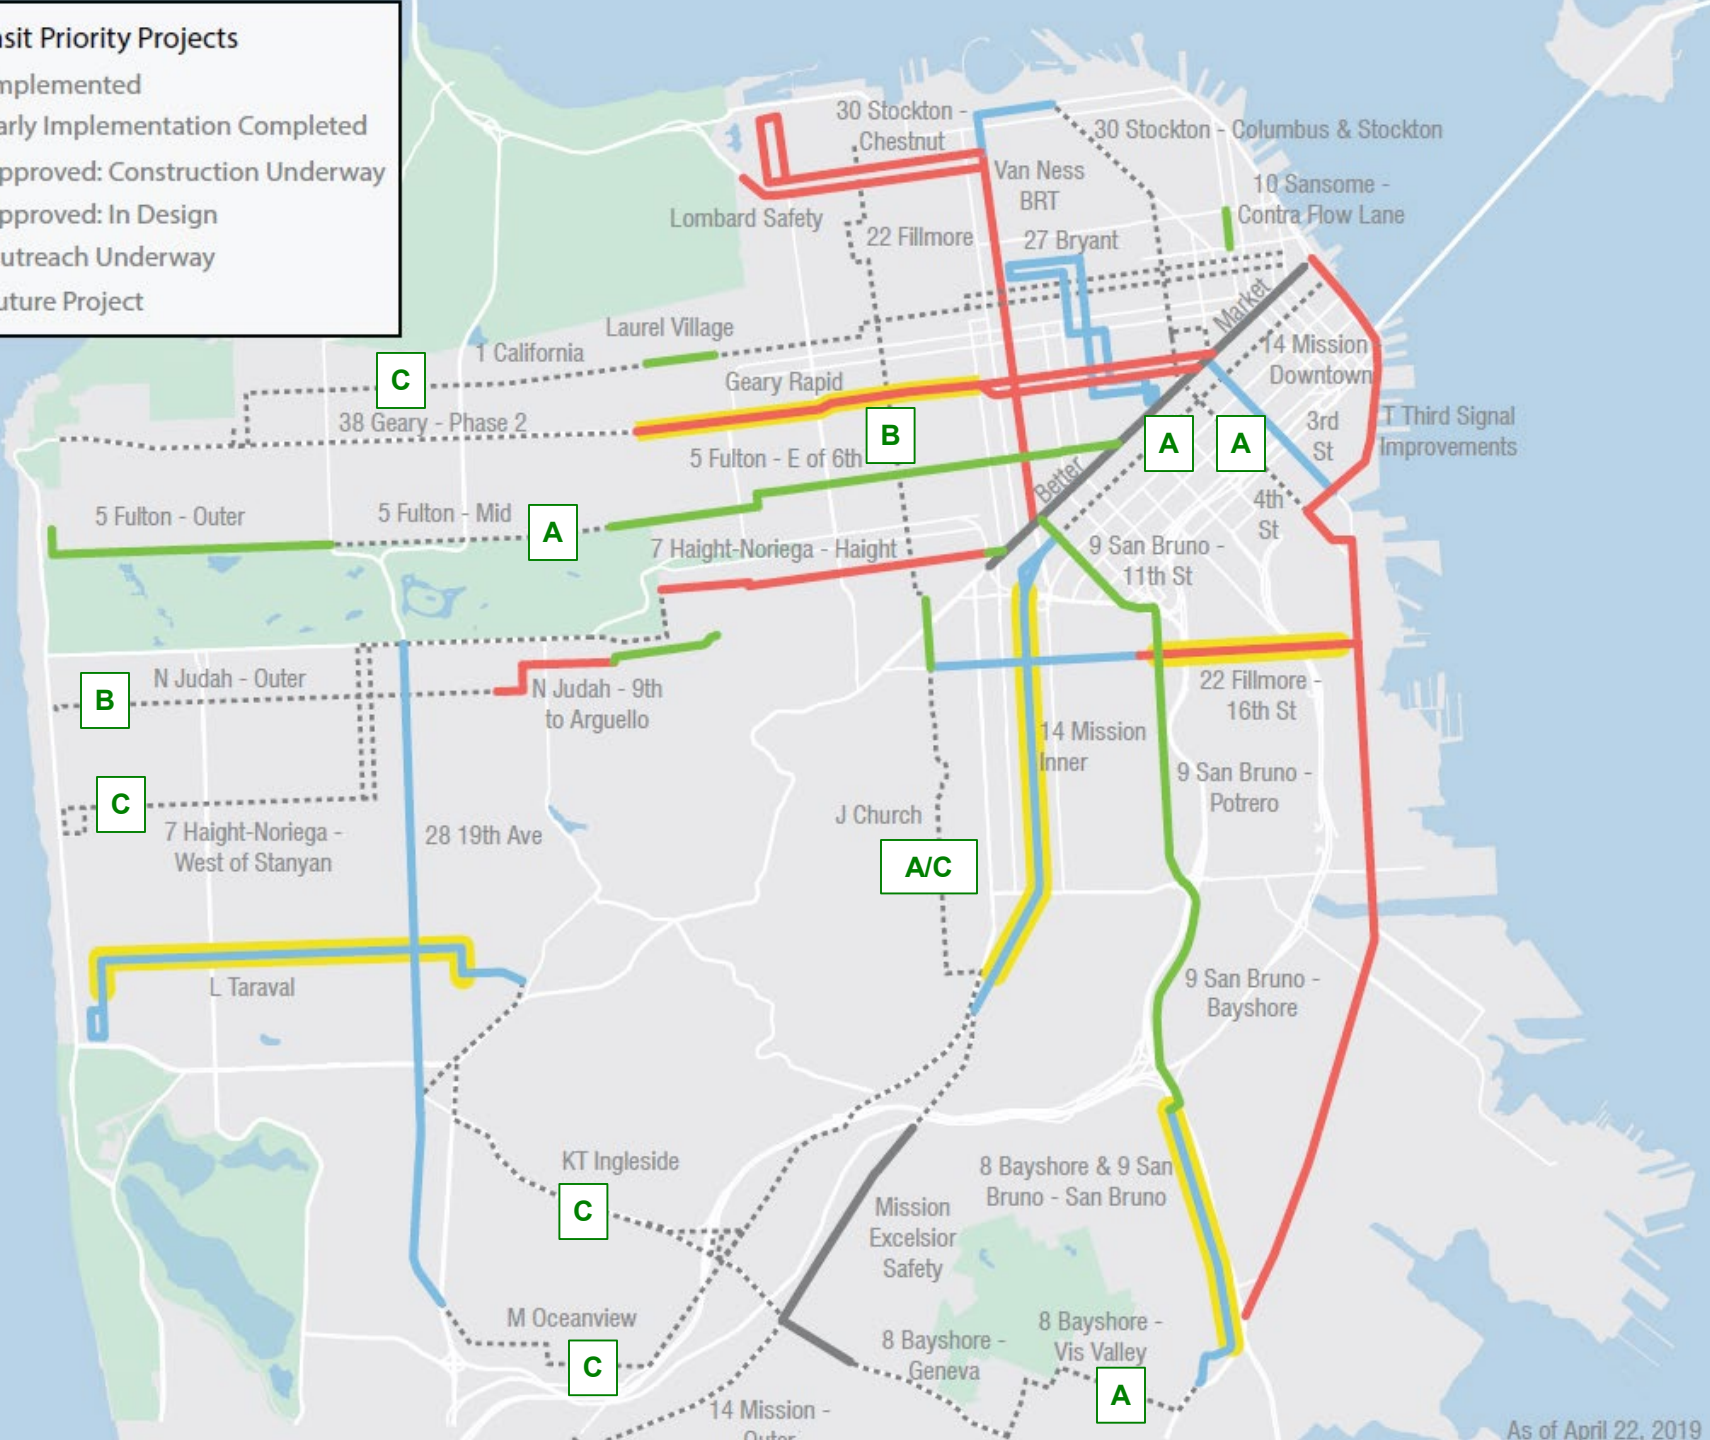

Muni Forward

- **Improving reliability:** Over 50 miles of reliability improvements, like transit-only lanes, bus bulbs and traffic signals that stay green for transit
- **Creating a Rapid Network:** More Rapid lines and expanded frequency
- **More service:** 10% service increase since 2015 and new connections
- **Brand new fleet:** All-new bus and rail vehicles
- **Equity:** A focus on improving service in Equity Strategy neighborhoods

SFMTA Transit Priority Projects

- Implemented
- Early Implementation Completed
- Approved: Construction Underway
- Approved: In Design
- Outreach Underway
- Future Project

5 Fulton Rapid Project

Traffic circle

Traffic signals

Transit bulbs

Ped island and flashing beacon

9 Rapid Improvements
