

PAGE ST BIKEWAY IMPROVEMENTS

Pilot Project

COMING SOON!

Starting **late February 2020** new safety improvements are coming to Page Street between Webster and Octavia streets. Look out for the following vehicle circulation changes, with changes to permit parking zones to follow.

During construction, exercise care when using the street.

Page Street Bikeway Improvements Pilot Project Evaluation

Winter 2020

How will the pilot project work?

The pilot bikeway and circulation changes will be implemented using temporary materials (signs, paint, and plastic posts), remaining in place for 12 months to allow for data collection, outreach, and evaluation. The Board of Directors will have to re-approve the project based on the outcome of the pilot to make the changes permanent.

What will SFMTA study during the pilot?

Safety

- Collisions and ‘close calls’ between users on Page Street
- Users’ perception of safety and comfort on Page Street

Mobility

- Vehicle and bicycle volumes on Page Street; Vehicle volumes on Haight and Oak streets
- Vehicle queuing and incidents of crosswalk/intersection blocking on Haight and Oak streets
- Traffic circulation changes on other streets throughout the neighborhood
- Transit travel time on Haight Street

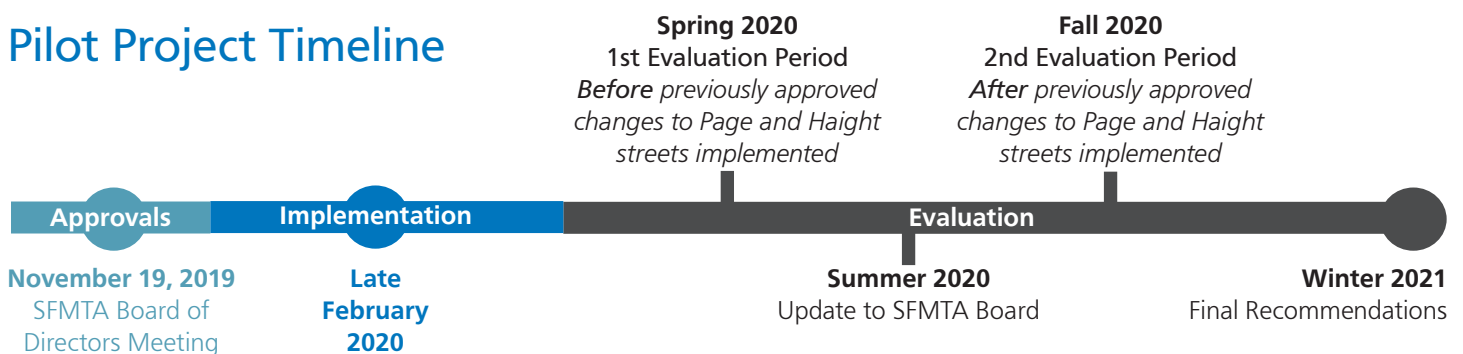

Design Effectiveness

- Compliance with the traffic divertors and turn restrictions
- Violations of Muni-only lane on Haight Street

Public perception

- *A public perception survey would be available to all neighborhood stakeholders to more comprehensively capture their opinions of the modified traffic patterns. **Sign up for project updates to be notified of when the survey is available!***
