

Large Vehicle Driver Training Program Pledge

We support Vision Zero, the goal to end all traffic deaths and serious injuries in our cities by 2024. We commit to support San Francisco's efforts towards Vision Zero by providing the SFMTA's Vision Zero Large Vehicle Driver Training video to all of our drivers.

Our company wants to help lead the way to achieving Vision Zero. Operating a large commercial vehicle on our crowded urban streets is a challenge for even the most careful professional driver and we are committed to ensuring that our drivers are aware about the ever changing design and use of city streets to keep them, and everyone else, safe.

By committing to showing this video to our drivers, we understand that we'll be recognized for our leadership in creating safe streets.

This will include:

- Public recognition of our commitment to safer streets:
 - ✓ Listing on the Vision Zero Safe Driving Partners page on the City of SF Vision Zero webpage
 - ✓ Opportunity to attend press conference and for a driver to participate at a potential future press event
- Ability to use high quality, wear-and-tear-resistant Vision Zero SF bumper stickers or decals for all company vehicles
- The reassurance that we've taken the first step towards Vision Zero by training our drivers on how to be safe on urban streets

In making this pledge, we commit to showing the Large Vehicle Driver training video to all drivers within a month.
