| esponse ID | Comment | Received Date | SFMTA Response |
| sponse ID | Comment | Received Date | Noted. SFMTA is seeking additional funding to make all crosswalks high visibility |
| 1 | Conti | 11/23/2020 | contintental. |
| | | | Noted. SFMTA is seeking additional funding to make all crosswalks high visibility |
| 2 | Continental crosswalks | 11/23/2020 | contintental. |
| | Milester on with the annual character of 22nd and Annual Melestinal of an average From itset | | The traffic circle on Anza Street at 23rd Avenue was installed as a traffic calming |
| 4 | What's up with the roundabout at 23rd and Anza? It's kind of an eyesore. Even just a better planting would help. | 12/7/2020 | device. We reviewed collision history at this location and no changes to the trafficircle were indicated as necessary. |
| | be sure to put down green paint in key areas of the lane to strongly remind drivers | 12/1/2020 | ende vere maleacea as necessary. |
| 7 | that it is a bike lane | 12/7/2020 | Noted. Project does not include funding for green paint in bike facilities. |
| 8 | crosswalks where there are currently none | 12/7/2020 | Noted |
| 9 | Recommend you make it a 4-way stop at 9th and Clement. It's so hard to pull out from 9th Ave. If you're going to add the bike lanes - make the bikers stop at all the stop signs too. Why do add bike lanes on Anza - They have the GG Park - car free. Lake Ave. is car-free too. Propose that you make bike lanes on Lake Ave instead. | 12/7/2020 | Noted. Please submit your request for stop signs to 311. SFMTA has supported bicycle safety education for many years. By designating new lanes just for bikes, are addressing SFMTA's first strategic goal, "Create a safer transportation experience for everyone". While Cabrillo Street provides a parallel roadway for bicyclists, Anza Street is already being used by many cyclists because of easier topography through 26th Avenue and connection to schools. |
| | Lake Ave. is car-free too. Propose that you make blike lailes on Lake Ave instead. | 12/1/2020 | topography through 20th Avenue and connection to schools. |
| 10 | 8th Avenue appears to be a favored side street, whereas 7th Avenue is not. The crosswalk at Anza and 8th Avenue has a small concrete median that calms traffic. There is also a speed bump west of 8th Avenue on Anza. How about doing the same for the block between 7th and 6th Avenues? | 12/7/2020 | Noted. While this project does not include scope for installation of center media or speed humps, SFMTA appreciates your insight. We encourage neighbors to submit an application for Residential Traffic Calming project which can evaluate these blocks for speed hump installation. |
| 12 | buffer zones on corners, daylighting, speed bumps, limit right turn on red at | 12/7/2020 | Noted. The scope of this project does not include passenger safety zones, |
| 12 | intersections like Arguello. a protected bike lane would help establish a central route that could connect to | 12/7/2020 | daylighting, speed humps not right-turn restrictions. |
| 13 | a protected blke lane would nelp establish a central route that could connect to safer streets, it could serve as the central spine of protected buke lane improvements and a real opportunity to develop multimodal travelways for all ages and abilities. | 12/7/2020 | Noted |
| | | | |
| 4.4 | N. | 42/7/2020 | Cyclists are required to follow the same rules of the road as other vehicles. Ther |
| 14 15 | No Signs to indicate that STOP signs apply to bikers too. | 12/7/2020 | no official sign in our toolkit that would convey this message to cyclists. |
| 15 | signs to indicate that stort signs apply to blices too. | 12/1/2020 | Noted |
| 16 | Speed bumps between Arguello and Stanyan. | 12/7/2020 | Noted. Project funding is not sufficient to install speed humps. We encourage neighbors to submit an application for the Residential Traffic Calming project which can evaluate these blocks for speed hump installation. |
| 18 | NO, keep bikes on Cabrillo not Anza. | 12/7/2020 | By designating new bikes lanes on Anza Street, we can make cycling safer on Ar Street, thus working towards our first strategic goal, "Create a safer transportat experience for everyone". While Cabrillo Street provides a parallel roadway for bicyclists, Anza Street is already being used by many cyclists because of easier topography through 26th Avenue and connection to schools. |
| 20 | Protected bike lanes or a slow street. Regular bike lanes aren't safe | 12/7/2020 | Noted. Given the large amount of driveways along Anza Street, adding a prote bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no drivew and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
| 21 | I recommend no bike land on Anza There is currently Cabrillo close by. Two bike lanes are not needed. And the bike traffic on Cabrillo is very light I walk it every day. | 12/7/2020 | Noted. By designating new bikes lanes on Anza Street, we can make cycling safe on Anza Street, thus working towards our first strategic goal, "Create a safer transportation experience for everyone". While Cabrillo Street provides a paral roadway for bicyclists, Anza Street is already being used by many cyclists becaus of easier topography through 26th Avenue and connection to schools. |
| 22 | I recommend no bike lane on Anza There is currently Cabrillo lanes close by. Two bike lanes are not needed. And the bike traffic on Cabrillo is very light I walk it every day. | 12/7/2020 | Given the large amount of driveways along Anza Street, adding a protected bik lane would prove to be difficult without obstructing access to those driveways. will look into stretches of Anza Street where there are no driveways and see whoptions would work best in order to increase bicyclist/pedestrian safety based collision history/patterns. |
| 24 | (1) Stop sign at 26th and Anz (2) Protected bike lanes on this whole stretch, if possible to design. | 12/7/2020 | Our project does not intend to install new 4-way stops at this time. We will be looking into installing new continental crosswalks at exsting stop locations that don't have them marked based on pedestrian volume and collision history per SFMTA standards. Given the large amount of driveways along Anza Street, addi a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase |
| 25 | Add more traffic circles and crosswalls medians | | Noted. Project scope does not include installation of new traffic circles or media islands. We will be looking into installing new continental crosswalks at existing Stop locations that don't have them marked based on pedestrian volume and |
| 25 | Add more traffic circles and crosswalk medians | 12/8/2020 | collision history per SFMTA standards. Noted. Project scope does not include installation of bulb-outs (sidewalk |
| 27 | Pedestrian bulb-outs at Anza and 8th Ave | 12/8/2020 | extensions). The intersection 8th Avenue at Anza Street does have median islar for traffic calming at the pedestrian crossing. |
| 28 | More stop signs and striped crosswalks. I live at 24th and Anza and crossing the street at crosswalks with no striping/stop signs is routinely scary. Drivers go fast to make the light at 25th and do not yield to pedestri | 12/8/2020 | Noted. Project scope does not include installation of new Stop signs. We are looking into installing high visibility continental crosswalks based on pedestrian volume and collision history per SFMTA standards, and pending available fundii |
| 29 | Add painted crosswalks at 24th and 26th Ave intersections. Even better: 4-way stops at these intersections. Remove traffic circle at 23rd and put in 4-way stop. | 12/8/2020 | Noted. This project does not intend to install new 4-way stops at this time. We looking into installing high visibility continental crosswalks based on pedestrian volume and collision history per SFMTA standards, and pending available funding the control of the |
| 20 | remove the stop signs and put in light that are allow a cyclist to ride without | 42/0/25== | Noted British and decreased and the British and the Control of the |
| 30 | having to stop. Like Valencia Street More traffic circles like at 23rd (less stop signs which become points of conflict for | 12/8/2020 | Noted. Project scope does not include installation of bicycle signals at this time. |
| | I work traine choice like at 23rd (less stop signs which become points of conflict for | | |

| | Sales also bits long a consequent of drivers and drivers and drivers in about Doffees of bits long | | Noted. Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways |
|----------|--|-----------|--|
| 33 | Make the bike lanes protected so drivers can't drive in them. Buffered bike lanes aren't good enough. | 12/8/2020 | and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
| 34 | painted buffer zone between parked cars and bike lane | | Noted. Please see above. |
| 35 | Switch the parking lane and bike lane so the bike lane is protected. We've seen multiple pedestrian and cyclist deaths on the westside this year as a result of reckless drivers. Protecting the bike lane will increase driver compliance with the law re: blocked bike lanes and save lives. | 12/8/2020 | Noted. Please see above. |
| | protected bike lanes please- many reckless drivers will drive in bike lanes! and lights | | Noted. Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian |
| 36 | across the street at crosswalks for drivers to easily spot pedestrians/cyclists | 12/8/2020 | safety based on collision history/patterns. |
| 38 | signage and enforcement of rules of the road for bikes to protect pedestrians | 12/8/2020 | Noted. SFMTA supports bicycle safety education, including media campaigns and free classes. |
| 39 | Widening sidewalks, protected bike lanes (not just green paint), raised bike lanes (or any way to further separate the bike lane from the road). | 12/8/2020 | Noted. Project scope does not currently allow for widening of sidewalks. Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
| 41 | Speed bumps | 12/8/2020 | Noted. Project scope does not currently allow for installation of speed humps. We encourage neighbors to submit an application for the Residential Traffic Calming project which can evaluate blocks of concern for speed hump installation. |
| 43 | Intersection of Stanyan and Anza needs more than a bike lane to make it safe for pedestrians, e.g., additional signage, remove old signage that is not enforced ("no vans allowed"), right turn from Stanyan to Anza (eastbound) is dangerous. This tiny space does not allow adequate expression. | 12/8/2020 | Noted. Installation of new signage and removal of old signage will be a part of this project. |
| | | | Project scope does not currently include installation of speed humps. We encourage neighbors to submit an application for the Residential Traffic Calming |
| 47 | Speed bumps | 12/9/2020 | project which can evaluate blocks of concern for speed hump installation. Project scope does not currently include installation of daylighting (removing |
| 49 | Daylighting | 12/9/2020 | parking in advance of pedestrian crossings). |
| 50 | daylighting our crosswalks is very helpful | 12/9/2020 | Project scope does not currently include installation of daylighting (removing parking in advance of pedestrian crossings). |
| 52 | Physical barriers to protect active road users, timed lights (more lights, then acutally!) Traffic circles (properly implmented w/ yeild signs!) | 12/9/2020 | Noted. Project scope does not currently include installation of traffic circles or |
| 53 | Any/all traffic calming everywhere in the city is necessary. Speed limit in the city should be 15mph, enforced by camera (I know state law must change), and be massively enforced and heavily fined. | | Notes. Project scope does not currently include installation of traffic calming devices. We encourage neighbors to submit an application for the Residential Traffic Calming project which can evaluate blocks of concern for speed hump installation. |
| 54 | | | In-pavement crosswalk lights have very high maintenance cost and so are not used in San Francisco. |
| 55 | Please install blinking lights at crosswalks so there's better visibility for motorists. I would love separated/protected bike lanes. We need them in the western part of the city. | | Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
| 56 | complete the repaying, it's so much smoother and safer! | 12/9/2020 | Noted. This project scope does not currently include paving. SF Dept of Public Works has a project on the eastern part of the project area that has repaved part of Anza Street. |
| 57 | daylighting; road diet; + speed humps | 12/9/2020 | Noted. Project scope does not currently include installation of daylighting or speed humps. We encourage neighbors to submit an application for the Residential Traffic Calming project which can evaluate blocks of concern for speed hump installation. |
| 58 | more roundabouts and a protected bike lane | 12/9/2020 | Noted. Project scope does not currently include installation of new traffic circles. Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
| | | | Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on |
| 59 | Protection for the bike lane would make me feel safer riding there with our kids. | 12/9/2020 | collision history/patterns. Noted. Project scope does not currently include installation of new median islands |
| 61 | More crossing islands | 12/9/2020 | at pedestrian crossings. |
| 62 | Put the parking on the outside and the bikelanes parallel to the sidewalk (similar to Fell street along the Panhandle) for more safe bike lanes The streeth of Anza N of USF could be better lit and the parking situation there | 12/9/2020 | Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
| 64 | feels dangerous to cyclists. | 12/9/2020 | Noted. |
| 66 67 | Please daylight the corners of 23rd Ave and Anza for crossing north-south. It is difficult to see oncoming east-west traffic when cycling. Daylighting | | Project scope does not currently include installation of daylighting. Project scope does not currently include installation of daylighting. |
| | | | |

| 68 | Please make the bike lane protected! Put it next to the curb, and put the parked cars between the bike lane and the car lane. Some streets in SoMa have this layout and it's much much safer than a bike lane right next to car traffic. | 12/10/2020 | Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
|----------|---|--------------------------|---|
| 70 | Crosswalks at Blake and Wood | | The Project is looking into funding to install continental crosswalks at locations with existing curb ramps based on pedestrian volume and collision history per SFMTA standards. |
| 74 | Would recommend traffic calming in addition to the bike lanes similar to Vicente (speed bumps) and improvements at intersections (protected intersections if possible or related treatments). | | Project scope does not currently include installation of traffic calming devices. We encourage neighbors to submit an application for the Residential Traffic Calming project which can evaluate blocks of concern for speed hump installation. |
| 75 | Correct the intersection at 23rd Avenue and Anza so that all directions have equal priority to cross. | | Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
| 76 | Physically protected bike lanes, at least between 30th Ave and Arguello. There is street width!!! Parking lanes don't need to be 9' wide. Please make it parking protected. Else it is actually not any safer than it is today. | 12/14/2020 | Noted. Please see above. |
| | I am in full support of adding bike lanes, but it is honestly a little embarrassing that we aren't even really trying here. By removing one side of parking you could have protected bike lanes, but instead we are going to spend a year thinking about what amounts to adding some new paint on the road and little else. It's ok to do | | |
| 77 | good things, seriously! | | Noted. Please see above. |
| 78 | Protected bike lanes! At least add rumble strips! | | Noted. Please see above. |
| 79 | Parking protected bike lanes! | 12/14/2020 | Noted. Please see above. |
| 80 | Protected bike lanes. Paint isn't enough. paint is not protection. I want bicycle infrastructure to keep car drivers out of the | 12/14/2020 | Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
| 81 | bike lanes and out of the crosswalks | 12/14/2020 | Noted. Please see above. |
| 82 | Please protect the bike lane. Paint is not protection. Parking protection (like we have on Fell along the panhandle) would be great. | | Noted. Please see above. |
| 83 | We need protected bike lanes. There's enough room here, so why not do it? | | Noted. Please see above. |
| | protected bike lane instead of painted bike lane, also speed bumps and stop signs | | |
| 84 85 | every block for cars More bike lanes in generally | 12/14/2020 12/14/2020 | Noted. Please see above. |
| 86 | protected bike lanes would make so much sense here. Next to cars is too unsafe. with protected lanes, I would ride with my family. | 12/14/2020 | Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
| | Paint is not infrastructure and door-zone bike lanes are not safe or adequate. | | |
| 87 | Please have the courage to remove parking and install physical separation. | 12/14/2020 | Noted. Please see above. |
| 88 | Protected lanes or parking-protected lanes | | Noted. Please see above. |
| | | | |
| 89 | adding bike lanes is great but it would be nice if they could be made parking protected (especially in the section where they'll be 9' wide) or have some additional buffer (maybe further narrow the vehicle and parking lanes) | 12/14/2020 | Noted. Please see above. |
| 90 | Physical barriers to protect active road users, green wave for cyclists at 14mph, Traffic circles (properly implemented w/ yield signs!). This project with paint only and not protected bikelanes is dangerous. PLEASE protect my kids! | | Noted. Please see above. |
| 91 | separated bike lanes | 12/14/2020 | Noted. Please see above. |
| 92 | Additional speed bumps on Anza to help reduce traffic speed | 12/14/2020 | Project scope does not currently include speed humps. We encourage neighbors to submit an application for the Residential Traffic Calming project which can evaluate blocks of concern for speed hump installation. |
| 93 | These should be BARRIER PROTECTED lanes, not painted lanes. Preserving parking is far less important than keeping riders safe. | 12/14/2020 | Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
| 94 | Please put stop signs in both directions on Anza at 24th. I cross there several times a week with my baby, and it's dangerous. | | Noted. Project scope does not currently include installations of new 4-way stop contol. We will be looking into installing new continental crosswalks at existing 4-way stop intersections with ADA compliant curb ramps based on pedestrian volume and collision history per SFMTA standards. |
| 95 | It would seem preferable to design *actual* safe bike lanes along the whole length, using the street's width to buffer the cycle lanes on the sidewalk side of car parking to eliminate conflicts with cars pulling out, in, doors opening, etc. | | Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
| 96 | Protected bike lanes, this would significantly improve the safety of cycling and would ensure that traffic would be calmed with reduced width for cars | 12/14/2020 | Noted. Please see above. |
| 97 | PROTECTED bike lanes. There is space with existing parking and PLENTY of space if some parking is removed. Painted bike lanes statistically do little to nothing to improve cyclist safety and with such wide existing corridors we should take advantage of the space and actually protect our most vulnerable road users. | | Noted. Please see above. |
| | | | |

| | Wider bike lanes in some sections 6' and 5' are not enough space to safely avoid | | |
|------------|---|--------------|--|
| 99 | parked car doors and cars driving past. | 12/15/2020 | Noted. Staff continues reviewing design details for proposed bike lanes. |
| | If necessary/possible, have a weight monitor underneath the bicycle icon on the | | |
| | road at the park presidio intersection like the one at ArgÃ1/4ello and fulton. THANK | | |
| 102 | YOU SO MUCH FOR CONSIDERING THIS AND OUR BIKE SAFETY!! | 12/15/2020 | Noted. |
| | | | Given the large amount of driveways along Anza Street, adding a protected bike |
| | | | lane would prove to be difficult without obstructing access to those driveways. W |
| | I would recommend making them protected bike lanes by bumping out the | | will look into stretches of Anza Street where there are no driveways and see what |
| 103 | parking and putting the bike lanes against the sidewalk - it will notably improve safety for bikers. | 12/15/2020 | options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
| 105 | Yes. More mini traffic islands like the ones on Anza and 8th Ave. NO roundabouts | 12, 13, 2020 | comson ristory/ patterns. |
| 105 | please! Especially not with bike lanes! | 12/15/2020 | Noted. Project scope does not currently include median islands or traffic circles. |
| | None. The street is plenty wide enough for cyclists and cyclyists rarely travel on Anza. Besides there is a very large hill between 27-28th Streets that no cyclist | | |
| 106 | would travel in either direction. | 12/15/2020 | Noted. |
| | | , , | |
| | | | Project scope does not include installation of new stop signs. We are looking into |
| 107 | Stop sign at 16th and Balboa east/west bound | 12/16/2020 | installing high visibility continental crosswalks based on pedestrian volume and collision history per SFMTA standards, and pending available funding. |
| | - top - g · to - to in a real county / to - to | 12, 13, 222 | F |
| 108 | The eastern portion of the project is the most important: please include it. | 12/17/2020 | Noted. |
| | | | Noted. This project scope does not currently include traffic calming devices. Please |
| | | | refer to SFMTA's Residential Traffic Calming Program for more information on ho |
| 400 | Cars regularly don't stop at stop signs (properly) or drive too fast. Perhaps more | 42/47/2020 | you can request an evaluation for speed humps: https://www.sfmta.com/getting |
| 109 110 | speed bumps or another method of control? No, it's fine the way it is. | 12/17/2020 | around/walk/residential-traffic-calming-program. |
| 110 | Any/all traffic calming everywhere in the city is necessary. Speed limit in the city | 12/11/2020 | INOCCU. |
| | should be 15mph, enforced by camera (I know state law must change), and be | | |
| | massively enforced and heavily fined. Cars dominate every street in the city. We | | |
| | must segregate some traffic and reallocate some streets for human beings. The Great Highway and JFK closures to cars this year have been transformative. Never | | |
| 111 | go back! | 12/17/2020 | Noted. Project scope does not include installation of new traffic calming devices. |
| | The bike lanes should be parking-protected! Unprotected bike-lanes are dangerous | | |
| | and outdated. Taking public space away from dangerous, inefficient, climate- | | Given the large amount of driveways along Anza Street, adding a protected bike |
| | destroying cars would be a benefit, not a trade-off! It's extremely wasteful to go through a time-consuming design, outreach and implementation process only to | | lane would prove to be difficult without obstructing access to those driveways. W will look into stretches of Anza Street where there are no driveways and see wha |
| | install a half-measure bike lane that won't keep cyclists safe and still preserves too | | options would work best in order to increase bicyclist/pedestrian safety based on |
| 112 | much public space for cars. | 12/18/2020 | collision history/patterns. |
| | I'm really disappointed this is paint-only. I tentatively support it because of that. | | |
| | People biking deserve protection. I've been hit multiple times in paint-only lanes in San Francisco. I can't believe in 2020 that's still what is being proposed, especially in | | |
| | a year where our vision zero numbers are going the wrong direction. So I would | | |
| | really encourage SFMTA to actually find creative ways to get real protection in, | | |
| 113 | because paint is not that. | 12/18/2020 | Noted. Please see above. |
| 114 | bulb out, intersection daylighting, speed humps, 4-way stops, | 12/18/2020 | Noted. Project scope does not currently include speed humps, daylighting or 4-w stop control. |
| | Protected bike lanes. Protected intersections! Remove street parking! Like the | | |
| | majority of people in SF, I don't own a car. And yet the city is setup for free | | Noted Delication of the second control of th |
| 115 | (subsidized) parking for those dang death + pollution machines. Also do some real daylighting at intersections come on. | 12/18/2020 | Noted. Project scope does not currently include projected intersections or daylighting. Please see above for more information. |
| | | , , , | |
| | I would love to see continental crosswalks, daylighting, painted safety zones, | | Noted. While this project does not include scope for daylighting, we will be |
| 116 | pedestrian refuge islands, etc to help pedestrians better cross the wide streets and calm car traffic. | 12/18/2020 | looking into installing new continental crosswalks at existing 4-way stop locations based on pedestrian volume and collision history per SFMTA standards. |
| 110 | cum cur cumc. | 12/ 10/ 2020 | based on pedestrian volume and comision history per 31 MTA standards. |
| | | | Given the large amount of driveways along Anza Street, adding a protected bike |
| | | | lane would prove to be difficult without obstructing access to those driveways. W |
| | these bike lanes should be protected, unprotected bike lanes don't actually help | | will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on |
| 117 | prevent death. There is plenty of street space to do this. | 12/18/2020 | collision history/patterns. |
| | I would strongly recommend protected bike lanes for Anza Street. There is plenty | | |
| 110 | of room on the street for a protected lane and would dramatically improve rider | 12/10/2020 | Noted Please see above |
| 118 120 | safety vs. an unprotected painted lane. | 12/18/2020 | Noted. Please see above. Noted. |
| - | Many of these streets are lacking crosswalksâ€"bike lanes exist on Geary, a block | , ., | |

| | 140 | | 12/1/2020 | Noted. |

| | The bike lanes on Cabrillo work just fine, and are just two blocks away. It takes literally two minutes to go south two blocks from Anza to Cabrillo. | | Noted. By designating new bike lanes, we can work towards our first strategic goal, "Create a safer transportation experience for everyone". By separating bicycle from auto traffic, bike lanes can increase the predictability of interactions between |
|-----|---|-----------|---|
| 141 | Additionally, even from 8 to 9 am on workdays, the Cabrillo lanes were never crowded pre-pandemic. So, there really isn't demand for a bike lane on Anza. | 12/1/2020 | bicyclist and motorist. Anza Street is already being used by many cyclists because of easier topography through 26th Avenue and connection to schools. |
| 142 | Cabrillo bike lane is sufficient. Anza bike lane is not needed and resources used for other purposes | 12/2/2020 | Noted. Please see above. |
| | I am curious as to why this is being suggested when there is currently a parallel route on Cabrillo Street, two blocks away. As a walker, I support bike lanes when bikers abide by existing laws and common courtesies. I walk along Cabrillo and | | |
| 143 | Anza daily and find safety issues involving cyclists annoying and inconvenient. Please do not extend the difficulties to walkers to another East/West street. | 12/2/2020 | Noted. Please see above. |
| 144 | I would like to know if you've considered coordinating with other departments to make a project like this be more impactful/be complemented by adding trees to Anza St. Also, to go East-West there are already bike lanes on Cabrillo and also Lake. Do we really need more? I'd really rather see money/efforts in putting trees on this street | 12/7/2020 | Noted. Project scope and budget will not support landscaping improvements at this time. By designating new bike lanes, we can work towards our first strategic goal, "Create a safer transportation experience for everyone". By separating bicycle from auto traffic, bike lanes can increase the predictability of interactions between bicyclist and motorist. Anza Street is already being used by many cyclists because of easier topography through 26th Avenue and connection to schools. |
| 145 | 1) As the space for vehicles gets less wide (from 34' to 20'), please incorporate a lane striping down the middle of the road as part of the project to separate east bound and west bound vehicular traffic. There are many folks here who have trouble keeping to their side of the road already and with a narrower road on darker streets, it could be trouble to not have a clear stripe. 2) If there are options for the green color, personally I would prefer something more muted than bright. 3) When will this be completed? | 12/7/2020 | All existing centerlines will be maintained. We will also be looking into adding them at various locations given the existing ADT and roadway widths per SFMTA standards. Project is expected to be implemented by Spring 2021 pending public hearing in early 2021 |
| | , | , , | |
| 146 | Part of me wonders how your recent actions comply with CEQA. It would seem that you are implementing a major project to the streets of our area without doing the proper study, engagement, or mitigations. At a minimum, SFMTA owes the Richmond District a complete traffic study that details specific impacts from its compounding mess of individual projects. | 12/7/2020 | Noted. |
| 147 | There are bike lanes on Balboa. That's a block close to the park than Anza. I don't get the rationale. There are bike lanes on Arguello which feed into the park. Isn't it safer for bikers to leave some streets for cars while other streets serve scooter, bike and skate boarders? I live off of Anza and don't see it as a street in dire need of calming like Balboa. There are many stop signs to keep things calm. | 12/7/2020 | Noted. By designating new lanes just for bikes, we can make cycling safer on Anza Street, helping work towards our first strategic goal, "Create a safer transportation experience for everyone". While Cabrillo Street provides a parallel roadway for bicyclists, Anza Street is already being used by many cyclists because of easier topography through 26th Avenue and connection to schools. |
| 147 | There are many stop signs to keep triings caim. | 12/7/2020 | topography through zoth Avenue and connection to schools. |
| | I agree that Anza is wide enough in most places to have bicycle lanes next to car traffic, but I was wondering what you are proposing to do at the left turn lanes, such as at Park Presidio and Arguello? I think east of Parker would be a bit more problematic. Now that we are making bicycle riding easier, how about trying to teach the bikers to observe traffic rules, such as stopping (or at least slowing down) at stop signs? | | At the approaches to Park Presidio we are proposing to maintain the existing left turn lane and thru lane with the addition of sharrows, similar to the intersection of Cabrillo & Park Presidio. Another option we will look into is removing the parking near the two approaches to allow for the bike lane to continue curbside without the need for sharrows. As for the intersection of Arguello, the left turn lane will be maintained per the existing configuration and the bike lane would be kept |
| 148 | By the way, in the survey there was a choice whether I live within 2 blocks of Anza or I commute along Anza, but there was no way to choose both, which I do. | 12/7/2020 | curbside. We will be looking into adding 2-stage left turn boxes within the intersection to help facilitate bicyclist who want to make a left onto Arguello but without having to get into the left turn pocket to do so. |
| | There are four reasons that I believe this project — while thoughtfully conceived — should not proceed as described in your plan. | | |
| | There is no funding for "future safety improvements". I believe such safety improvements are a prerequisite for any implementation of cycling lanes, not the other way around. | | |
| | Road traffic conditions are relatively less safe for cyclists on the "Eastern Extension" section of Anza St. compared with the "Core Project. Traffic interactions between motorists and cyclists, or cyclists and pedestrians — excluding violations of law — are already overwhelmingly gentle and manageable in the "Core Project" area. | | Noted. By designating new lanes just for bikes, we are addressing SFMTA's first |
| 149 | 4. I don't believe that the potential gains in cyclists' utility from this project will outweigh the immediate losses of parking spaces and increase in traffic congestion in the "Eastern Extension" from lane removal. | 12/7/2020 | strategic goal, "Create a safer transportation experience for everyone". Additionally, SFMTA is seeking additional funding to convert all crosswalks in the project area to high visibility contintental. |
| | Will this project include adding 4-way stops where missing along Anza St. (e.g. 23rd, 24th, 26th Ave)? If not, will this project include adding painted crosswalks where missing along Anza | | Our project does not intend to install new 4-way stops at this time. We will be looking into installing new continental crosswalks at existing stop locations that dont have them marked based on pedestrian volume and collision history per |
| 150 | St. (e.g. 24th Ave)? | 12/8/2020 | SFMTA standards. |

| | I'm so glad you are strongly considering bike lanes on Anza. | | |
|-----|---|-----------|--|
| | I would like to see some added safety measures, changes, to Anza from 32nd Avenue westward. | | |
| | I bike along this strip regularly. The most prevalent problems I encounter, which put my life in danger: | | |
| | - cars entering from cross streets that do not yield to me when appropriate - cars double parking - cars doing U-turns | | |
| | It seems you may not have funding to extend the scope of this project. How about just a little, like at least sharrows? Painted bike lanes would be even better. If none of this is possible, maybe you could at least include it "for future development"? | | |
| 151 | As with the rest of Anza, some of the problems are due to the large width of the road. | 12/8/2020 | Noted. |
| 152 | Does the bike lane project include adding speed bumps at al to Anza St. for bicycling safety? Especially in the corridor between Arguello and 2nd St, cars zoom by super fast. | 12/8/2020 | Our project does not intend to install speed bumps at this time. Please refer to SFMTA's Residential Traffic Calming Program for more information on how you can request for speed bumps/humps. https://www.sfmta.com/gettingaround/walk/residential-traffic-calming-program |
| | | | |
| 153 | First, I want to express my strong support for the core Anza St bike lane project and am thrilled that SFMTA is taking steps to protect bicyclists in the Richmond. For about 3 years I've lived in the Richmond as both a driver and bicycle rider, near both the beginning and end of the core project (38th Ave, 23rd Ave, and Arguello Blvd at different times). I've always found the Cabrillo Street bike lane difficult to navigate due to its hills and illegal parking in the bike lane. The Anza St bike lane would be the closest bike lane to my home and would be my main artery for traveling to and from work, family, and any destinations outside the Richmond. Second, I want to ask whether it's possible to protect the proposed bike lane in a similar manner to the Fell Street bike lane ie. by placing the bike lane between the parking lane and the sidewalk. Doing so would make me feel much safer as a bicyclist for a few reasons *R makes illegal parking and stopping in the bike lane much harder for drivers *Dooring incidents would push me onto the sidewalk rather than into traffic Third, I want to voice my strong support for the eastern extension of the project. If anything, I believe the eastern extension is more crucial for bicyclist safety than the core project. Currently to reach the essential stores on Masonic (Trader Joe's, Target), I travel south to Golden Gate Park, through the Panhandle, then north on Masonic. I travel three sides of a large rectangle to avoid speeding drivers on Turk. A connection through Anza would be invaluable in saving time and allowing direct trips to these businesses. | | Noted. Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. Our project does not intend to install speed bumps at this time. Please refer to SFMTA's Residential Traffic Calming Program for more information on how you can request for speed bumps/humps. https://www.sfmta.com/gettingaround/walk/residential-traffic-calming-program |
| 155 | Without a right turn lane at Parker, between the left-turners, right-turners and straight aheaders, this will be a much worse. Same goes for eliminating the double lane at Stanyan/Anza for those turning left to go north on Stanyan from Anza. During these hours in normal times, this configuration at Parker and Anza will increase the danger for pedestrians. Can we assume the bikes will start obeying the "rules of the road" and stop at the intersection? Will they yield to pedestrians and cross traffic like cars do (and they are supposed to)? As noted on the website, the parking will be exacerbated for people attending UCSF and those living in the units on the north side of Anza none of which have a garage. And, unless configured like Bay St with bumpers at the back of the parking space, a "loading zone" and then the bike lane behind next to the curb, the "back in" configuration will be causing cars to stop and back up over the bike lane. This is the unsafe configuration depicted in the little diagrams on the website for the "Anza Street Bike Lanes." It is not the same as Bay St. On Bay St, the bike lane is next to the curb and the cars park between the bike lane and traffic lane. But isn't there enough room for this on Anza? Does the sidewalk have to be 15 feet wide? Maybe it could be 10 feet wide at that point and provide enough space to do the Bay St configuration. The diagram on the website does not reflect that there is a right turn only lane eastbound on Anza at Parker. Will that be a shared lane for bikes and cars? I guess yes. And, are they proposing to remove the left turn only lane at Masonic? I hope No. | 12/0/2020 | Noted. At Anza Street / Parker Avenue we a proposing to remove the right turn lane in order to fit the bike lane and separate cars and bikes. Vehicles would then be using the single lane to continue straight or to make a right turn from this lane. We our currently working on our traffic analysis model to see if the right turn pocket can be removed without signicantly increasing delay along Anza Street. If our analysis indicates there will be signicant delay, we will maintain the right turn pocket and provide a different configuration. |
| 156 | I don't really see the point of the Anza bike lane proposal with Cabrillo, Lake and JFK as nearby east/west routes. Even with regular trips to USF rec center, where I'd consider using Anza I don't see a tremendous benefit. | | Noted. |

| | Eastbound just east of Arguello, running along Rossi Playground, there is regular double parking for two reasons: Parents dropping off kids for organized sports on the fields (especially summer programs), and morning work vehicles including extended parking of the trailer for the rider mower that cuts the grass (and occasionally other big trucks working at Rossi). Future lane configuration may want to consider loading zones or some other way to discourage double parking in the bike lane. | | |
|-----|---|------------|--|
| 157 | The stop signs every block make Anza hard on a bike during peak times (when cars are queued to cross so you can't just roll them). If there is any chance we can convert 4-way stops to roundabouts, as we now have at 23rd Avenue, that would be great. But good luck with that I know the neighbors just fought to get a four-way stop added to 2nd a few years back (and I'm friendly with the people who organized for that because they felt it was a safety issue due to speeding cars on Anza). | | Noted. We will look into solutions that would mitigate double parking, especially near the park. As for removing stops signs, our project does not intend to remove any at this time but we are looking into adding continental crosswalks at stop sign locations that currently have no existing marked crosswalks in order to help with pedestrian visibility. We will also be looking at different options (other than stops signs) for intersections that have no existing traffic control based on collision history. |
| | Creating bike lines on Anza will lead to more bikes running stop signs resulting in more traffic accidents. I walk frequently on Anza from Arguello to Park Presidio and bicyclists never even slow down for the stop signs. | | |
| | Ballooa would be a much more natural fit for bike lanes since there are two lanes flowing West and one going East. It would be easy to convert one of the lanes. Plus, there are existing bike lanes on Turk at Arugello that that new bike lanes on Ballooa can flow into. | | |
| 158 | Additional benefits are the traffic lights at 5th and 6th which can help prevent accidents since they slow all traffic and the bikes actually stop for them. Plus the car traffic is lighter and people drive a bit slower on Balboa particularly after Park Presidio. | | Noted. By designating new lanes just for bikes, we can make cycling safer on Anza Street, helping work towards our first strategic goal, "Create a safer transportation experience for everyone". While Balboa Street is a parallel roadway, it has more commercial activity with correspondingly higher probability of interaction between cars and bikes. Anza Street is already being used by many cyclists because of easier topography through 26th Avenue and connection to schools. |
| 136 | | 12/6/2020 | copography unough zour Avenue and connection to schools. |
| | In a nutshell, I think the project looks great. I don't really feel like Anza between Arguello and 30th needs bike lanes that badly. I mainly ride it from 9th to Masonic, though, so I am less familiar with 9th-30th Avenues. However, two things: 1.) Any | | |
| | time we can get bikes to be a more visible part of the transportation infrastructure in the City, I am all for it, and 2.) The Eastern Extension? THAT would be awesome, and sorely needed in my experience. Heading east, the perpendicularly parked cars are sketchy. Headed west (often unevenly with loaded Trader Joe's panniers, of course) the cars come up the side-street hills and often jut into Anza. This is understandable because they need to see around the parked cars for oncoming traffic, but it can be dangerous. It can also provoke a minor heart attack as you are | | |
| | pumping up the hill lopsided with groceries and a car looks like it's going to speed through the turn. I think if there were bike lanes there combined with some sort of traffic calming, or signs announcing that they're coming up to a bike lane at the top of the hill (do these even exist?), it could be helpful. | | |
| 159 | Also, wondering if these are going to be the solid green lanes or just the white stripe? I think anything helps, though of course the green are a little more eye-catching and, at this point, great "branding" for the forward-thinking urban cycling infrastructure. | 12/11/2020 | Noted. In our current design we are not proposing green within the bike lane but will look into adding it at locations where there is poor visibility of cyclists, especially at high traffic areas (i.e. Arguello, Stanyan & Masonic). |
| | I'm an amateur cyclist and live at Anza and 21st. I bike with my kids to school and to the park all the time. I love this project and would like to support it however I | | |
| 160 | can. Please keep me in the loop. | 12/15/2020 | Notea. |
| 454 | Against bike lanes on Anza. The majority of bikers do not stop at stop signs and lanes will only make it worst. It is difficult to back out of driveways now, with more bike traffic, it will be worst. There are already lanes on Lake and Cabrillo only six streets apart. Do we really need another lane? Especially when the City budget is going to be | 42/40/2020 | |
| 161 | strapped for years, causing red uced services and possible layoffs? I think that there is very little use in making new bike lanes which are not fully | 12/18/2020 | NOIGU. |
| | protected. Lane narrowing is great as it will reduce vehicle speeds, so that part of this project is great. However, my understanding of the data is that unprotected bike lanes do not actually prevent death or serious injury. There appears to be plenty of space for protected bike lanes here. Could we not do a cycle track or | | Noted. Given the large amount of driveways along Anza Street, adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian |
| 162 | something? | 12/18/2020 | safety based on collision history/patterns. |
| | I live in the Outer Richmond on Balboa. I was hit by a car years ago while in a Class II bike lane and suffered a traumatic brain injury. The lines on the ground do little to improve cyclist safety on an already mellow corridor. We need to do more to segregate the modes of bicycle and car travel. | | |
| | I know that people HATE anything that takes away parking, which might be necessary for a real protected bike lane that would positively impact safety. | | |
| 163 | Here are two ideas that vastly outperform, in terms of safety, the current plan: 1.Move the bike lane to the other side of the parked cars, next to the curb. 2.Make the Slow Streets plan permanent, save a ton of money, and have the only through traffic be bicycles. Much safer, cheaper, and doesn't interfere with sanctimonious parking. | 12/19/2020 | Noted. Given the large amount of driveways along Anza Street adding a protected bike lane would prove to be difficult without obstructing access to those driveways. We will look into stretches of Anza Street where there are no driveways and see what options would work best in order to increase bicyclist/pedestrian safety based on collision history/patterns. |
| | | | |

| | 1. Proposal stated that 30th to Arguello is relatively flat. This is not true. | | |
|-----|--|--------------------------|--|
| | | | |
| | From 30th Ave (Washington High) to 26th Ave is quite steep. So much so that I | | |
| | have never seen a biker brake or slow down whenever they are riding downhill. | | |
| | The bicyclist speed is always fast because of momentum going downhill. | | |
| | Life and leave of CENATA and all account of the first had a second order of the first | | |
| | I do not know if SFMTA actually surveyed the site but as a pedestrian standing on | | |
| | the corner of 26th and Anza, I do not have a clear line of vision and cannot see | | |
| | cyclists as they are going downhill all the way from 30th Avenue. Pedestrain / | | |
| | bicyclist accidents are not unheard if in the City. At present there is only a two way | | |
| | stop sign on 26th and Anza. When you are driving, it is even more difficult to spot a cyclist speeding downhill from 28th Avenue. Thankfully, at present there | | |
| | are not that many cyclists/skateboarders going down 30th/26th Avenue route. I | | |
| | hope it stay that way and really believe that it will be for everyone's best interest if | | |
| | proposed bike lane starts at 25th Avenue instead of 30th Avenue. | | |
| | | | |
| | 2. Width of propsed bike lane is 6 feet | | |
| | | | |
| | The width of the bike lane should be a bit narrower, 5 feet instead of 6. This is the | | |
| | width of the Cabrillo bike lane, I think. As a motorist, I need to stay 3 feet away | | |
| | from the cyclist. This is not a problem if they ride right in the middle of their bike | | |
| | lane or ride in tandem. Too often, cyclists have a tendency to ride towards the left | | |
| | (away from the parked car) and they ride as a group, especially those | | |
| | tourists/family/leisurely type. If I have to keep 3 feet distance from a cyclist who is | | |
| | riding very near the edge of the lane, my car will not have enough clearance for | | |
| | the car coming from the other direction. At present, traffic along Anza is not busy | | |
| 461 | so I can dodge or stop but with the proposed Geary corridor project , I am afraid | 40/00/00== | Noted |
| 164 | more car will be diverted onto Anza making safely a real issue here. | 12/20/2020 | Notea. |
| | | | |
| | I'm writing to express my strong support for the Anza Bike Lane Project. I'm sorry I | | |
| | missed the open house deadline, so I hope these comments can still be taken into | | |
| | account. | | |
| | I currently live on Anza & 5th with my longtime partner. We are car-free | | |
| | household, so biking, walking, and transit are a way of life. | | |
| | The Richmond has a very sparse bike network and we desperately need more bike | | |
| | lane infrastructure (preferably protected) to support the growing community of families and individuals who bike. | | |
| | For instance, at least half a dozen households on our block regularly get around by | | |
| | bike. The house next door to us has two family units with at least four kids | | |
| | between them–I see them every morning on their ebikes. My neighbors and me are | | Noted. Given the large amount of driveways along Anza Street, adding a protected |
| | not the exception: there are many other households on 5th & Anza that clearly use | | bike lane would prove to be difficult without obstructing access to those |
| | their bikes on a weekly basis. | | driveways. We will look into stretches of Anza Street where there are no driveways |
| | | | |

As someone who lives on Anza right by the bike lane and is a proponent of safe streets and non-motorized transportation, I wanted to make sure to voice my support for the project. I live on the eastern extension between Masonic and Arguello. I would like to voice that it is not a good fit to add bike lanes and re-design the street parking. - A good portion of the street parking is used by Univ of San Francisco students. USF has just built and added hundreds of new dorms to increase student admissions, which means more student cars will be on the streets and we need every space possible. The proposed angled parking will reduce street parking which we cannot afford to give up. Also, all the streets here have street cleaning every day of the week, which limit parking spaces. - Reducing the width of the lanes will also be extremely tight, adding risk to drivers coming out of garages. - In the evenings, both sides of the street have limited street lighting, adding risk to bicyclists. - Turk Street currently has a bike lane, however the street is much wider which includes three auto lanes with a bike lane (west bound). | | safety based on collision history/patterns. |
| | all ages and abilities to enjoy the joy of biking in the Richmond.
