

Clean Air Taxi Rebate

The San Francisco Municipal Transportation Agency (SFMTA) is a leader in providing and regulating environmentally sustainable transportation options, including the taxi fleet. Over 90% vehicles used in the taxi fleet are low-emission and play a critical role in meeting the city's ambitious climate goals of 80% of trips taken by sustainable means of travel by 2030 and zero emissions by 2050. In order to achieve our goals, the SFMTA's clean air taxi program offers a rebate up to \$7,000** per qualifying vehicle with a total of \$350,000* in dedicated funding.

The new rebate is only for the following brand-new eligible vehicle types purchased since January 7, 2020:

- 🍃 **\$5,000**** for each hybrid vehicle
- 🍃 **\$5,000**** for each compressed natural gas (CNG) vehicle
- 🍃 **\$7,000**** for each Accessible CNG vehicle
- 🍃 **\$7,000**** for each electric or hydrogen fuel cell vehicle

To request a rebate, please provide the following documents:

- Vehicle Registration (not temporary registration)
- Copy of sales invoice or purchase order
- IRS Form W-9
- For large cab company fleet purchases, a spreadsheet listing each vehicle's make, model, year, fuel type, VIN, and date vehicle was put in service as a taxicab

This rebate is in addition to any existing federal, state, and local tax credits that may be available for such vehicles.

Please submit the information to SFTaxi@sfmta.com, or at the **Taxi Window** at One South Van Ness.

For questions, contact Danny.Yeung@sfmta.com.

* Grants disbursed on a first come first serve basis. ** The new increased rebate is effective starting January 7, 2020. Vehicle purchased between July 1, 2016 to December 31, 2019 referred to the old rebate rate available online <https://www.sfmta.com/clean-air-taxi-rebate>
