

10th ANNUAL SENIOR AND DISABLED

# Mobility Workshop

## Building Healthy, Mobile, Independent Communities

Keeping seniors and people with disabilities functioning with maximum independence and encouraging health and social networks.

**THIS IS AN EXCITING TIME** for the Alameda County Transportation Commission (Alameda CTC) Paratransit Program. For several years, our technical advisory committee and the Paratransit Advisory and Planning Committee (PAPCO), with the support of staff, have been engaged in planning for increased coordination and mobility management activities to better connect consumers to the range of services that are available.

Mobility management is gaining traction in the Bay Area and increasingly being implemented at the county level. This year's workshop will look at how new technology and innovative design will change the game. It is designed to give us the tools and technical expertise necessary to understand and plan for these exciting changes.

Please RSVP by June 21 to Naomi Armenta, Alameda CTC Paratransit Coordinator (510) 208-7469 or [narmenta@alamedactc.org](mailto:narmenta@alamedactc.org)

- Space is limited, don't delay!
- Lunch will be provided.
- Please let us know if you need special accommodations.

**Monday, July 1, 2013**  
**9:30AM – 3:30PM**  
**Ed Roberts Campus**

3075 Adeline St., Berkeley, CA 94703  
(at the Ashby BART Station)

For transit access information  
call 511 or visit [511.org](http://511.org)

You are invited!

**Program Overview:**

**9:30 – 10:00 a.m.**

**Registration and  
Resource Fair**

**10:00 a.m. – 12:00 p.m.**

**Morning Program**

**12:00 – 1:15 p.m.**

**Lunch, Resource Fair  
& Self-Guided Tour**

**1:15 – 3:30 p.m.**

**Afternoon  
Program**

# Workshop Overview

- **Use of New Technology in Improving Accessible Transportation**

Peer-2-peer and dynamic ridesharing and autonomous vehicles: what do these even mean? Find out how they are shaping the future of accessible transportation. Paul Supawanich and Bonnie Nelson of Nelson\Nygaard will give an exciting introduction to the use of technology in improving mobility for seniors and people with disabilities.

- **Integrating Universal and Sustainable Design: the Ed Robert Campus**

Bill Leddy of Leddy Maytum Stacy Architects, the architecture firm that designed the Ed Roberts Campus, will speak about how the firm combined sustainable and Universal Design to create a space that is inviting and accessible for all users and is integrated with the Ashby BART station. Mr. Leddy will also highlight features of the ERC that can then be explored during the lunchtime self-guided tour.

- **Accessible Parking Policy in San Francisco**

The San Francisco Metropolitan Transportation Agency's (SFMTA) SFpark Division has recently sought to develop a set of recommendations to revise the current accessible parking policies that are impacting the ability of drivers, including those with disabilities, to secure parking in San Francisco. Through a six month intensive consensus building process, the group developed a set of recommendations that SFMTA will be presenting to the California Department of Motor Vehicles this summer.

- **Panel on Facilitating Mobility**

Regional mobility management partners will speak about the efforts of the regional mobility management working group. We'll also hear about the Mobility Resources Inventory in Alameda and Contra Costa Counties designed to enhance coordination of services throughout the region. Richard Weiner and Naomi Armenta will speak about Alameda CTC's Mobility Management project, which aims to improve travel training coordination, assure full coverage throughout the county, and assemble consolidated travel training outreach information for web and print distribution.

## Self-Guided Tour

Explore the award winning Ed Roberts Center, its connection to the BART station and surrounding streets and all its accessible features.

## Resource Fair

Resource Fair features participants representing accessible technology and the use of new devices.

## Bingo!

This year's bingo game includes items from the Resource Fair and the Self-Guided Tour.
