BAYVIEW QUICK-BUILD TRANSPORTATION PROJECTS

EVANS AVE/HUNTERS POINT BLVD/INNES AVE

Over the past five years there have been **22 reported traffic collisions that resulted in injury**. In October 2019, a traffic collision on Evans Avenue resulted in a fatality.

Unsafe speeds, turns, or lane changes accounted for 60% of injury collisions along the project area. Quick-build projects aim to reduce the risk of traffic-related injuries or deaths.

Quick-builds are reversible, adjustable traffic safety improvements that can be installed relatively quickly. Project goals include:

Increasing visibility, safety, and comfort for pedestrians

Preventing reckless driving and slowing down vehicle speeds

Enhancing safety and comfort for people using the existing bike lanes

Project Timeline

PROJECT LOCATION

Locations for these improvements were identified during the planning phase of the Bayview Community Based Transportation Plan

COMMON QUICK-BUILD IMPROVEMENTS
