THREE PROJECTS, ONE DISTRICT

Western Addition Community-Based Transportation Plan

Lower Haight Public Realm Plan

Page Street Green Connections

Join us for a special Open House to learn more about three community-based efforts to improve the streets, sidewalks, and public places in the Western Addition, Lower Haight and Hayes Valley neighborhoods:

- The Western Addition Community-Based Transportation Plan's overall goal is to improve the community's transportation options and enhance access to more employment and education opportunities.
- The Lower Haight Public Realm Plan is working to develop a community-based vision that will complement and enhance the neighborhood's public spaces.
- As part of the Octavia Boulevard Enhancement Project, the Page Street Green Connections Project is about making Page Street a more walkable, bikeable, and sustainable corridor in the Hayes Valley neighborhood.

This drop-in open house format will allow for you to learn more about these projects and ask questions of city staff before providing feedback on progress made thus far, including conceptual draft designs for Haight, Page and corridors in the Western Addition.

MAY 9, 2016

MONDAY 5:30-7:30 PM

JOHN MUIR ELEMENTARY SCHOOL

380 Webster Street  ADA ACCESSIBLE

(between Oak St. + Page St.)
