Geary Boulevard Improvement Project

公開會議 | Общественные Слушания | Reunión Pública

The Geary Boulevard Improvement Project is the second phase of improvements proposed on Geary Boulevard. This project aims to build on the success of the eastern Geary corridor improvements by making similar transit and safety upgrades between 34th Avenue and Stanyan Street.

Geary 街改善工程旨在改善 Geary 街在 34 大道和 Stanyan 街之間路段的交通和安全。此項工程包括新的公交專用車道、公車站遷址、交通信號燈升級以及公車站和十字路口的人行道擴建。此項工程公聽會將於 8 月 15 日星期二下午 1 點在市政廳（地址：1 Dr. Carlton B. Goodlett Place）的 400 號會議室舉行。

В рамках проекта модернизации Geary Boulevard предлагается оптимизировать движение транспорта и повысить общую безопасность на участке между 34th Avenue и Stanyan Street. Проект предусматривает выделение новых полос для общественного транспорта, изменения автобусных остановок, модернизацию светофоров, а также обустройство расширений тротуаров на автобусных остановках и углах перекрестков. Общественная экспертиза по данному проекту состоится во вторник, 15 августа, в 13:00 в Городской администрации по адресу: 1 Dr. Carlton B. Goodlett Place, Room 400.

SFMTA Public Hearing

A public hearing for the proposals below will be held on Tuesday, August 15 to take public comment, discuss and vote on adoption of the Geary Boulevard Improvement Project's parking and traffic changes:

- Installing transit lanes between 28th and 15th avenues. To make room, angled parking on Geary would be converted to parallel parking.
- Transit improvements, including relocating 10 bus stops, removing two closely-spaced stops, new bus bulb-outs and lengthening bus zones that are too short to accommodate two buses.
- Safety improvements, including pedestrian bulb-outs, daylighting, expanded median refuges and left-turn restrictions at key intersections.
- Curb space changes to accommodate business loading needs; and converting some parallel parking to angled parking on some cross streets to partially offset parking loss on Geary Boulevard due to project proposals. Total net parking change would be 31 fewer spaces along the two-mile project area, or less than one parking space per block on average.

The SFMTA Board will be asked to decide whether to: 1) approve the project and implement all Quick-Build improvements, including transit lanes, around fall 2023 as recommended by staff; or 2) approve the project but defer implementation of some transit lanes until 2025.
