

Spring 2022

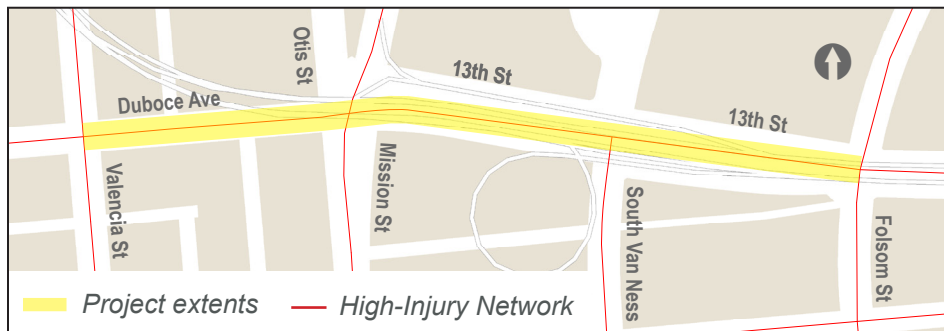

# 13th Street Safety Project

## We want to hear from you!

From April 18 to 30, the SFMTA is hosting a virtual open house as one way to provide more information about project proposals and collect feedback.

Additionally, the SFMTA project team will be hosting in-person and online office hours to discuss project proposals with you in detail to provide opportunities for you to ask questions.

Access the virtual open house from the project website or at: [SFMTA.com/13thStreetOpenHouse](https://sfmta.com/13thStreetOpenHouse)

The 13th Street corridor is part of the city's High-Injury Network, the 13 percent of streets that disproportionately account for 75 percent of severe and fatal traffic collisions.

In a recent five year period, **99 collisions occurred in the project area, and over one-third of these involved bicyclists or pedestrians.**

This project is in support of **Vision Zero**, the City's commitment to eliminate collisions and prioritize traffic safety.

## PROJECT GOALS

The 13th Street Safety Project aims to:

- Improve sense of traffic safety and comfort for all who travel on the 13th Street corridor between Folsom Street and Valencia Street
- Reduce the number of conflicts between those who walk, bike and drive along this corridor
- Increase the connectivity of San Francisco's bicycle network

# PROPOSED IMPROVEMENTS

Sidewalk extensions to increase pedestrian visibility at intersections and shorten crossings

Parking and loading changes to maximize use of curb space

Protected bike lanes to physically separate people riding bikes from people driving

Signal timing and hardware upgrades to help control and organize traffic flow
