

# Vision Zero Quick-Build Project Updates

February 2025

## Project Status Update

### Sutter Street Quick-Build Project

After careful consideration and thorough evaluation, the SFMTA has decided to pause the project. Throughout 2024, the project team worked on design options for the Sutter Street Quick Build Project. However, after carefully evaluating design constraints and trade-offs, we have decided to pause the project. The limited street width creates technical challenges in balancing the need for loading zones, parking, and emergency access while also improving safety.

Furthermore, Muni service change scenarios recently presented to the SFMTA Board of Directors on February 4, 2025 include potential changes to the 2 Sutter route. Given the uncertainty surrounding the future of transit service on Sutter Street, it is important to us that project designs are aligned with future Muni service.

## Under Construction

### Lake Merced Boulevard Quick-Build Project

The Lake Merced Quick-Build Project continued construction in February. San Francisco Public Works (SFPW) crews completed two bus boarding islands on the corridor. The completed boarding islands are on the east side of Lake Merced Boulevard between John Muir Drive and Brotherhood Way. Before the quick-build project, Muni and Samtrans transit riders waited on a shared use path with cyclists and other pedestrians. The new boarding islands with curb ramps provide further protection and separation for bicyclists traveling northbound along Lake Merced Boulevard. Future work includes painting and signage to make the new infrastructure visible, and the construction of 4 additional concrete islands.

### Valencia Bikeway Improvements

Work to remove the center-running bike lane and install the parking-protected bikeway on Valencia Street between 15th Street and 23rd Street began this month. Crews from SFMTA and San Francisco Public works started with intersection transitions on Valencia Street at 15th Street and 23rd Street. Following that, crews began working from the south end of the corridor, moving northbound in segments to minimize disruptions. Work during February included removing striping, removing rubber curbs, removing plastic posts, closing the bike lane, and adjusting traffic signal timing to accommodate construction.
